Swiss Financial Market Supervisory Authority FINMA

Instructions: Cryptoasset reporting (version 7.0)

1 Reporting of cryptoassets

1.1 Introduction

A number of institutions in the Swiss financial market are now actively engaged in business with cryptoassets (hereinafter referred to “CA”). Whereas this market has at times been characterised by high growth, it also entails new types of risks. Consequently, within the framework of the DLT Act, new powers have been conferred upon FINMA in respect of custody activities by way of Article 4^{sexies} of the Banking Act (BA). In order for FINMA to be able to exercise these new powers, as well as to allow it to fulfil its supervisory mandate in general, there must be an adequate body of data as regards business activities involving CA.

1.2 Purpose

1.2.1 Purpose of CA reporting

FINMA’s intention with the CA reporting is to obtain an overview of CA-related activities and holdings at institutions that are involved in this type of business. FINMA reserves the right to make changes to CA reporting and welcomes suggestions for improvements.

1.2.2 Purpose of the instructions on CA reporting

The aim of these instructions is to make CA reporting easier for the institutions concerned and to ensure that the data collected is as comparable as possible. The information provided herein serves as a guide and may not be complete. The instructions are not to be construed as substituting the reporting institutions’ duty to conscientiously enter/report the data. In particular, these instructions do not represent any policy positions on the part of FINMA in the business areas concerned.

1.3 Scope

With CA reporting, data is collected in two dimensions. In the first, information is collected on activities, exposures, custody and staking solutions as well as other services offered by the institutions (see section 3 “Business areas and volumes” and section 4 “Custody and staking”). In the second, data is gathered on the different types of token administered by the institutions (see section 5 “Reporting per token”).

Laupenstrasse 27
3003 Bern
Tel. +41 (0)31 327 91 00
www.finma.ch

2 Basic information

The aim of these instructions is to give the reporting institutions a more concrete understanding of the items comprised in CA reporting. The following basic principles must be observed in the data collection process:

- Every institution is itself responsible for classifying the tokens included in its own offering as payment tokens, utility tokens or security tokens. For reporting purposes, hybrid tokens must be allocated to the largest classification category.

- There are no reporting requirements for tokens on the IT systems of licensed central securities depositories or payment systems, even if they use DLT. In Switzerland, this applies most notably to SDX AG.

- The term “security token” comprises all tokens with an investment character as specified in the FINMA Guidelines that satisfy the requirements of Article 2 let. b FinMIA in conjunction with Article 2 para. 1 FinMIO.

- Not all institutions will be able to provide data for all CA reporting items. If an institution has no business activities in a specific area, a zero value should be entered in the respective field or the field should be left blank if it does not require a figure to be entered.

The institutions should apply the following principles to reporting per token:

- A line should be filled out for each token in the respective sheet, up to a maximum of 50 lines.

- No reporting is required for all remaining tokens with a corresponding level of residual materiality.

3 Business areas and volumes

3.1 Crypto activities

Category	Explanation	Element to be specified	Denomination
Custody	Information on whether the institution currently provides custodial services for CA.	Yes / No	n/a
Trading for clients	Information on whether the institution currently offers CA trading for clients.	Yes / No	n/a
Transfer in and out of cryptoassets from/to external customer wallets	Information on whether the institution offers transfers in and out of cryptoassets from/to external customer wallets	Yes / No	n/a
Own account trading	Information on whether the institution trades CA for its own account.	Yes / No	n/a
Operation of an organised trading facility for CA	Information on whether the institution operates an organised trading facility for CA.	Yes / No	n/a
Issue of products	Information on whether the institution issues crypto-based products or products with CA as the reference value.	Yes / No	n/a
Loans collateralised with cryptoassets	Information on whether the institution offers loans collateralised with CA.	Yes / No	n/a
Tokenisation	Information on whether the institution offers tokenization services.	Yes / No	n/a

Category	Explanation	Element to be specified	Denomination
Staking	Information on whether the institution offers staking services.	Yes / No	n/a
Other current activities with CA	Information on whether other activities are currently offered with CA in addition to those already explicitly mentioned.	Text	n/a
Further planned future activities with CA	Information on whether other activities with CA are planned in the near future.	Text	n/a

3.2 Tokens on the balance sheet of the institution

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether CA are currently held on the balance sheet of the institution or whether this is planned. **Drop-down menu**	Text	n/a
Balance sheet value			
Planned volume	If there are plans in this area, approximate balance sheet value of the CA planned to be held on the balance sheet in future (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Total volume on reporting date	Balance sheet value of CA held on the balance sheet on the reporting date	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
RWA			
Amount	Risk-weighted positions for capital requirements	Number	CHF thousands
Description of calculation method	Brief description of how the RWA were calculated	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest balance sheet value	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Balance sheet value for this type of token	Number	CHF thousands
Other comments	General comments regarding the CA on the balance sheet	Text	n/a

3.3 Units in CA-related funds on the balance sheet of the institution

CA-related funds are deemed to be collective investment schemes (such as ETFs, hedge funds, fund of funds, etc.) that invest directly or indirectly predominantly in CA, replicate CA or otherwise pursue CA-related trading strategies.

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether CA-related funds are currently held on the balance sheet of the institution or whether this is planned. **Drop-down menu**	Text	n/a
Balance sheet value			
Planned volume	If there are plans in this area, approximate balance sheet value of the CA-related funds planned to be held on the balance sheet in future (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Balance sheet value of CA-related funds held on the balance sheet on the reporting date	Number	CHF thousands
RWA			
Amount	Risk-weighted positions for capital requirements	Number	CHF thousands
Description of calculation method	Brief description of how the RWA were calculated	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest share of the balance sheet value of the CA-related funds	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Estimated share of this type of token in the balance sheet value of these fund units	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
Other comments	General comments on the CA-related funds on the balance sheet	Text	n/a

3.4 Receivables in tokens

Receivables in tokens are deemed to be claims held by the institution against third parties that are denominated in tokens.

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether there are currently any receivables in tokens or whether this is planned. **Drop-down menu**	Text	n/a
Balance sheet value			
Planned volume	If there are plans in this area, approximate balance sheet value of the receivables in tokens anticipated in future according to these plans (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Balance sheet value of existing receivables in tokens as at the reporting date	Number	CHF thousands
EAD			
Amount	Amount of the position for the capital requirement of the credit exposure to the borrower without application of the risk weighting	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
Description of calculation method	Brief description of how the RWA were calculated	Text	n/a
RWA			
Amount	Total risk-weighted positions based on these receivables for capital requirement purposes (includes RWA for the risk of volatility in the value of the tokens as well as RWA for the credit exposure to the borrower)	Number	CHF thousands
Description of calculation method	Brief description of how the RWA were calculated	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest share of the balance sheet value of these receivables	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Balance sheet value of the receivables in this category of token	Number	CHF thousands
Other comments	General comments on receivables in tokens	Text	n/a

3.5 Tokens as collateral for credit risk mitigation

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether CA serve as collateral for credit risk mitigation or if this is planned. **Drop-down menu**	Text	n/a
Market value of collateral			
Planned volume	If there are plans in this area, approximate market value of the CA anticipated as collateral for credit risk mitigation in future according to these plans (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Market value of the CA serving as collateral for credit risk mitigation on the reporting date	Number	CHF thousands
Of which recognised as risk-mitigating measure (after application of haircuts):			
Amount	The value at which these CA can be recognised as risk-mitigating measures in the capital adequacy calculation (after application of haircuts)	Number	CHF thousands
Description of calculation method	Brief description of how this value and the haircuts were arrived at and of the approach used for recognition of the collateral	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest contribution to the tokens used as collateral for credit risk mitigation	Text	n/a

Category	Explanation	Element to be specified	Denomination
Abbreviation	Respective abbreviation	Text	n/a
Volume	Market value of the collateral in this category of token	Number	CHF thousands
Other comments	General comments on the tokens used as collateral for credit risk mitigation	Text	n/a

3.6 Structured products with CA as underlying reference asset (not including related hedging transactions)

Structured products on the balance sheet of the institution must be reported. Structured products in client custody accounts (off the balance sheet of the institution) do not have to be reported.

Only investment products that are fully pre-financed by clients should be entered here. Derivative financial instruments that could give rise to margin calls or other liabilities for clients should be reported as derivatives (see sections 3.7 and 3.8).

The prices of the following are examples of CA underlying reference assets:

1. Tokens
2. Derivatives on tokens (e.g. futures)
3. Units in CA-related funds
4. Derivatives on CA-related funds

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether there are any structured products with CA as underlying reference assets, or whether there any plans for such. **Drop-down menu**	Text	n/a
Client investment volumes			
Planned volume	If there are plans in this area, approximate client investment volume in structured products with CA as underlying reference assets anticipated in future according to these plans (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Client investment volume in structured products with CA as underlying reference assets	Number	CHF thousands
RWA			
Amount	Risk-weighted positions for capital requirement purposes for structured products not including the related hedging transactions. RWA for the related hedging transactions should be reported in the appropriate sections (e.g. “Tokens on the balance sheet”, “Linear derivatives”, etc.).	Number	CHF thousands
Description of calculation method	Brief description of how these RWA were calculated	Text	n/a
CA with the largest share of volume:			

Category	Explanation	Element to be specified	Denomination
Name	Name of the type of token with the largest share of investment volume in structured products with CA as underlying reference assets	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Client investment volume in structured products with this type of token as underlying reference asset	Number	CHF thousands
Other comments	General comments on the structured products with CA as underlying reference assets	Text	n/a

3.7 Linear derivatives with CA as underlying reference asset (not including structured products)

Linear derivatives are futures, forwards, CFDs, etc.

CA underlying reference assets are, for example, the prices of (i) tokens, (ii) derivatives on tokens (e.g. futures), (iii) units in CA-related funds, and (iv) derivatives on CA-related funds.

The gross nominal value is the sum of the absolute amounts of the underlying reference assets per contract.

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether there are any linear derivatives with CA as underlying reference assets, or whether there any plans for such. **Drop-down menu**	Text	n/a

Category	Explanation	Element to be specified	Denomination
Gross nominal value (sum of absolute amounts of underlying reference assets per contract)			
Planned volume	If there are plans in this area, approximate gross nominal value of such derivatives anticipated in future according to these plans (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Gross nominal value of linear derivatives with CA as underlying reference asset	Number	CHF thousands
Of which exchange-traded	Gross nominal value of exchange-traded linear derivatives with CA as underlying reference asset	Number	CHF thousands
Total RWA for position risks			
Amount	Risk-weighted position for the capital requirements for the risk from volatility in the value of the tokens (without counterparty credit risks and not including exchange rate risks between fiat currencies)	Number	CHF thousands
Description of calculation method	Brief description of how these RWA were calculated	Text	n/a
Credit equivalent for counterparty risks			
Amount	The credit equivalent for the capital adequacy requirements of counterparty credit risks of these derivatives without application of the risk weighting. The credit equivalent takes into account collateral provided by the institution and received by the institution	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
	(see Art. 62 para. 5 CAO). The credit equivalents in respect of all counterparties of OTC or exchange-traded derivatives, including central counterparties and clients, should be included.		
Description of calculation method	Brief description of how this credit equivalent was calculated	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest share of the gross nominal value of linear derivatives with CA as underlying reference assets	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Gross nominal value of linear derivatives with this type of token as underlying reference asset	Number	CHF thousands
Other comments	General comments on the linear derivatives with CA as underlying reference assets	Text	n/a

3.8 Non-linear derivatives with CA as underlying reference assets (not including structured products)

Non-linear derivatives are, for example, options.

CA underlying reference assets are, for example, the prices of (i) tokens, (ii) derivatives on tokens (e.g. futures), (iii) units in CA-related funds, and (iv) derivatives on CA-related funds.

The gross nominal value is the sum of the absolute amounts of the underlying reference assets per contract.

Category	Explanation	Element to be specified	Denomination
Activity status	Information as to whether there are any non-linear derivatives with CA as underlying reference asset or whether there any plans for such. **Drop-down menu**	Text	n/a
Gross nominal value (sum of absolute amounts of underlying reference assets per contract)			
Planned volume	If there are plans in this area, approximate gross nominal value of such derivatives anticipated in future according to these plans (e.g. same amount as “Volume on reporting date” if no changes are planned in respect of the business activity)	Number	CHF thousands
Volume on reporting date	Gross nominal value of non-linear derivatives with CA as underlying reference assets	Number	CHF thousands
Of which exchange-traded	Gross nominal value of exchange-traded non-linear derivatives with CA as underlying reference asset	Number	CHF thousands
Total RWA for position risks			
Amount	Risk-weighted position for the capital requirements for the risk from volatility in the value of the tokens (without counterparty credit risks and not including exchange rate risks between fiat currencies)	Number	CHF thousands
Description of calculation method	Brief description of how these RWA were calculated	Text	n/a
Credit equivalent for counterparty risks			

Category	Explanation	Element to be specified	Denomination
Amount	The credit equivalent for the capital adequacy requirements of counterparty credit risks of these derivatives without application of the risk weighting. The credit equivalent takes into account collateral provided by the institution and received by the institution (see Art. 62 para. 5 CAO). The credit equivalents in respect of all counterparties of OTC or exchange-traded derivatives, including central counterparties and clients, should be included.	Number	CHF thousands
Description of calculation method	Brief description of how this credit equivalent was calculated	Text	n/a
CA with the largest share of volume:			
Name	Name of the type of token with the largest share of the gross nominal value of non-linear derivatives with CA as underlying reference assets	Text	n/a
Abbreviation	Respective abbreviation	Text	n/a
Volume	Gross nominal value of non-linear derivatives with this type of token as underlying reference asset	Number	CHF thousands
Other comments	General comments on the non-linear derivatives with CA as underlying reference assets	Text	n/a

3.9 Other crypto-related business areas or position categories

Please specify an element for each additional business area, indicating the activity status and volume (if applicable) and providing a short description in the “Comments” field.

4 Custody and staking

4.1 General information

Category	Explanation	Element to be specified	Denomination
Number of types of payment tokens	Number of different types of tokens managed by the institution as a product that qualify as payment tokens.	Number	n/a
Number of types of utility tokens	Number of different types of tokens managed by the institution as a product that qualify as utility tokens.	Number	n/a
Number of types of security tokens	Number of different types of tokens managed by the institution as a product that qualify as security tokens.	Number	n/a
Number of custody account customers with tokens	Total number of the institution's clients customers with tokens in their custody accounts.	Number	n/a
Of which: Retail clients	Number of token custody account clients of the institution that belong to the retail client segment pursuant to article 4 para. 1 let. a FinSA.	Number	n/a
Of which: Professional clients	Number of token custody account clients of the institution that belong to the professional client segment pursuant to article 4 para. 1 let. b FinSA.	Number	n/a
Of which: Institutional clients	Number of token custody account clients of the institution that belong to the institutional clients segment pursuant to article 4 para. 1 let. c FinSA.	Number	n/a

Category	Explanation	Element to be specified	Denomination
Custody volume	Total of the institution's CA held in custody for itself or for clients.	Number	CHF thousands
Of which: Custody volume from retail clients	Custody volume from clients of the institution who belong to the retail client segment pursuant to article 4 para. 1 let. a FinSA.	Number	CHF thousands
Of which: Custody volume from professional clients	Custody volume from clients of the institution who belong to the professional client segment pursuant to article 4 para. 1 let. b FinSA.	Number	CHF thousands
Of which: Custody volume from institutional clients	Custody volume from clients of the institution that belong to the institutional clients segment pursuant to article 4 para. 1 let. c FinSA.	Number	CHF thousands
Number of staking clients	Total of the institution's clients with staked CA.	Number	n/a
Of which: Retail clients	Number of staking clients of the institution that belong to the retail client segment pursuant to article 4 para. 1 let. a FinSA.	Number	n/a
Of which: Professional clients	Number of staking clients of the institution that belong to the professional client segment pursuant to article 4 para. 1 let. b FinSA.	Number	n/a
Of which: Institutional clients	Number of staking clients of the institution that belong to the institutional clients segment pursuant to artcile 4 para. 1 let. c FinSA.	Number	n/a
Staking volume	Total CA staked for the institutioin itself or for clients.	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
Of which: staking volume from retail clients	Staking volume from clients of the institution who belong to the retail client segment pursuant to artcile 4 para. 1 let. a FinSA.	Number	CHF thousands
Of which: Staking volume from professional clients	Staking volume from clients of the institution who belong to the professional client segment pursuant to article 4 para. 1 let. b FinSA.	Number	CHF thousands
Of which: staking volume from institutional clients	Staking volume from clients of the institution that belong to the institutional clients segment pursuant to article4 para. 1 let. c FinSA.	Number	CHF thousands

4.2 Further information on custody volumes (self-custody)

Category	Explanation	Element to be specified	Denomination
Self-custody volume	Total CA held by the institution with its own custody infrastructure. **Calculated automatically from token reports.**	Number	CHF thousands
Volume of own holdings held in self-custody/nostro	Share of the CA held in custody that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: payment tokens	Proportion of self-custody payment tokens that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
Of which: utility tokens	Proportion of self-custody utility tokens that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: securities tokens	Proportion of security tokens held in custody that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Volume of client holdings held in custody	Proportion of CA held in custody by the institution for clients. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: payment tokens	Proportion of self-custody payment tokens held by the institution for customers. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: utility tokens	Proportion of self-custody utility tokens held by the institution for customers. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: security tokens	Proportion of self-custody security tokens held by the institution for clients. **Calculated automatically from token reports.**	Number	CHF thousands
Insurance cover for self-custody token holdings	Information on whether the institution has taken out insurance cover for the CA it holds in custody.	Yes / No	n/a
Scope of the insurance cover	Insurance cover for the institution for CA held in custody in the event of losses, e.g. due to cyber attacks, bugs, etc.	Number	CHF thousands

4.3 Further information on custody volumes (third-party custody)

Category	Explanation	Element to be specified	Denomination
Volume of third-party custody	Total CA held in custody by the institution via the custody infrastructure of a third party. **Calculated automatically from token reports.**	Number	CHF thousands
Volume of own assets held in custody/nostro	Proportion of CA held in custody for third parties that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: payment tokens	Proportion of payment tokens held in third-party custody that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: utility tokens	Proportion of utility tokens held in third-party custody that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: security tokens	Proportion of security tokens held in third-party custody that the institution holds for itself. **Calculated automatically from token reports.**	Number	CHF thousands
Volume of client holdings held in custody	Proportion of CA held in custody by third parties that the institution holds for clients. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: payment tokens	Proportion of payment tokens held in third-party custody that the institution holds for customers.	Number	CHF thousands

Category	Explanation	Element to be specified	Denomination
	Calculated automatically from token reports.		
Of which: utility tokens	Proportion of utility tokens held in third-party custody that the institution holds for clients. **Calculated automatically from token reports.**	Number	CHF thousands
Of which: security tokens	Proportion of security tokens held in third-party custody that the institution holds for clients. **Calculated automatically from token reports.**	Number	CHF thousands
Number of service providers for third-party custody	Number of service providers used by the institution that provide token custody services (including trading venues, brokers, etc. with which the institution holds CA in custody).	Number	n/a
Insurance cover for token holdings held in third-party custody	Information on whether the third parties engaged by the institution to provide token custody services have taken out insurance cover for the institution's CA.	Yes / No	n/a
Scope of the insurance cover	Cover for the institution for CA held in custody in the event of losses, e.g. due to cyber attacks, bugs, etc.	Number	CHF thousands

4.4 Further information on third-party custody

Category	Explanation	Element to be specified	Denomination
Names of service providers for third-party custody	Service provider's full official company name (according to the commercial register entry).	Text	n/a

Category	Explanation	Element to be specified	Denomination
Name of any sub-custodian	Service provider's full official company name (according to the commercial register entry).	Text	n/a
Custody volume	Information on the CA held in custody by the service provider on the reporting date	Number	CHF thousands
Trading volume	Information on the volume of trades in CA settled with the provider in the reporting period (i.e. since the last reporting date). Bilateral as well as multilateral trades should be entered. A zero value should be entered if the provider does not offer trading services.	Number	CHF thousands
Domicile/country of domicile	Information on the service provider's domicile and country of domicile	Text	n/a

4.5 Further information on staking activities

Category	Explanation	Element to be specified	Denomination
Token name	Official name of the native token or proof-of-stake-blockchain (e.g. Ethereum, Cardano, etc.).	Text	n/a
Token abbreviation	Symbol of the token.	Text	n/a

Category	Explanation	Element to be specified	Denomination
Staking service provider 1	Full company name of the staking service provider to which the institution delegates responsibility for staking to a third-party provider as part of a staking chain.	Text	n/a
Country of domicile	Details of the country of domicile of the staking service provider 1.	Text	n/a
Staking service provider 2	Full company name of the staking service provider to which the institution delegates responsibility for staking to a third-party provider as part of a staking chain.	Text	n/a
Country of domicile	Details of the country of domicile of the staking service provider 2.	Text	n/a
Staking service provider 3	Full company name of the staking service provider to which the institution delegates responsibility for staking to a third-party provider as part of a staking chain.	Text	n/a
Country of domicile	Details of the country of domicile of the staking service provider 3.	Text	n/a
Holder withdrawal key	Full company name of the holder of the withdrawal key to control the withdrawal of staked CA.	Text	n/a
Validator node operator	Full company name of the direct operator of a validator node of the blockchain - either as a staking (pool) operator or as a technical service provider.	Text	n/a
Validator address (PUK)	Public key of the blockchain address on which the CA are staked.	Text	n/a
Lock-up/exit period	Minimum duration of staking before the CA can be unstaked or duration between the commission of the unstaking order and the actual withdrawal of the staked CA.	Number	days

Category	Explanation	Element to be specified	Denomination
Staking rewards (APR)	Effective reward per year for the staked CA.	Number	%

5 Reporting per token

5.1 Information per token

Category	Explanation	Element to be specified	Denomination
Name of token	Official name of the token or DLT project according to the project organisation (e.g. Bitcoin, Ethereum, Litecoin, etc.).	Text	n/a
Token abbreviation	Represents the token.	Text	n/a
Total token holding	Institution's total token holdings across all business activities (including custody assets). Only tokens on the balance sheet are included (over and above custody assets). Does not include – in particular – units in CA-related funds, receivables in tokens, tokens as collateral for credit risk mitigation or synthetic positions in the form of derivatives or structured products.	Number	Tokens
Token's DLT facility	DLT facility on which the token is issued, administered and can be transferred.	Text	n/a
Token price	Price of the token as at noon on the reporting day on the liquid trading venue	Number	In CHF

5.2 Custody of payment and utility tokens

Category	Explanation	Element to be specified	Denomination
Of tokens held: Nostro (self-custody)	Part of the total holding of the token that the institution both holds for itself and stores itself.	Number	Tokens
Of tokens held: Nostro (third-party custody)	Part of the total holding of tokens the institution holds for itself but that is stored with a third party.	Number	Tokens
Of tokens held: custody asset with individual assignation (self-custody)	Part of the total holding of tokens that the institution holds in custody for clients with individual assignation to those clients in accordance with the requirements of art. 16 no. 1bis let. a BA.	Number	Tokens
Of tokens held: custody asset with pooling (self-custody)	Part of the total holding of tokens that the institution holds in custody for clients on a pooled basis in accordance with the requirements of art. 16 no. 1bis let. b BA.	Number	Tokens
Of tokens held: Custody asset with individualization (third-party custody)	Part of the total holding of tokens that the institution holds in custody for clients on an individualized basis with a third party in accordance with the provisions of article 16 para. 1bis let. a BA.	Number	Token
Of tokens held: Custody asset with pooling (third-party custody)	Part of the total holding of tokens that the institution holds in collective custody for clients with a third party in accordance with the provisions of article 16 para. 1bis let. b BA.	Number	Token
Of tokens held: Custody asset, fiduciary basis	Part of the total holding of tokens that the institution holds in fiduciary custody for clients in accordance with the provisions of article 16 para. 2 BA.	Number	Token

5.3 Custody of security tokens

Category	Explanation	Element to be specified	Denomination
Of tokens held: Nostro (self-custody)	Part of the total holding of the token that the institution both holds for itself and stores itself.	Number	Tokens
Of tokens held: Nostro (third-party custody)	Part of the total holding of the token that the institution holds for itself but that is stored with a third party.	Number	Tokens
Of tokens held: custody asset (self-custody)	Part of total holding of tokens that the institution holds in custody for clients and that qualify as custody assets in accordance with article 16 no. 1 BA.	Number	Tokens
Of tokens held: custody asset (third-party custody)	Part of the total holdings of tokens which the institution holds in custody for clients with a third party and which qualify as custody assets in accordance with article 16 para. 1 BA.	Number	Token
Of tokens held: custody asset, fiduciary basis	Part of the total holding of the token that the institution holds in custody for clients on a fiduciary basis in accordance with the requirements of article 16 no. 2 BA.	Number	Tokens
